Added the mandatory heading and subheadings for "Current Application Data".  Edited the "Number of Sequences" field. The applicant spelled out a number instead of using an integer.  Changed the spelling of a mandatory field (the headings or subheadings), specifically:  Corrected the SEO ID NO when obviously incorrect. The sequence numbers that were edited were:  Inserted or corrected a nucleic number at the end of a nucleic line. SEO ID NO's edited:  Corrected subheading placement. All responses must be on the same line as each subheading. If the applicant placed a response below the subheading, this was moved to its appropriate place.  Inserted colons after headings/subheadings. Headings edited included:  Defeted extra, invalid, headings used by an applicant, specifically:		Changed a file from non-ASCII to ASCII ENTERED CARP Processing Date: 6/10/200
Edited the Current Application Data section with the actual current number. The number inputted by the applicant was   the prior application data; or   other    Added the mandatory heading and subheadings for "Current Application Data".  Edited the "Number of Sequences" field. The applicant spelled out a number instead of using an integer Changed the spelling of a mandatory field (the headings or subheadings), specifically:  Corrected the SEQ ID NO when obviously incorrect. The sequence numbers that were edited were:  Inserted or corrected a nucleic number at the end of a nucleic line. SEQ ID NO's edited:  Corrected subheading placement. All responses must be on the same line as each subheading. If the applicant placed a response below the subheading, this was moved to its appropriate place.  Inserted colons after headings/subheadings. Headings edited included:  Defeted extra, invalid, headings used by an applicant, specifically:  Defeted mandatory headings, specifically:  Corrected an obvious error in the response, specifically:  Edited identifiers where upper case is used but lower case is required, or vice versa.  Corrected an error in the Number of Sequences field, specifically:  A 'Hard Pago Break' code was inserted by the applicant. All occurrences had to be deleted.  Defeted ending stop coden in amino acid sequences and adjusted the '(A)Length: field accordingly (error due) to a Patentin bug). Sequences corrected:  Other:		Changed the margins in cases where the sequence text was "wrapped" down to the next line.
Added the mandatory heading and subheadings for "Current Application Data".  Edited the "Number of Sequences" field. The applicant spelled out a number instead of using an integer. Changed the spelling of a mandatory field (the headings or subheadings), specifically.  Corrected the SEO ID NO when obviously incorrect. The sequence numbers that were edited were:  Inserted or corrected a nucleic number at the end of a nucleic line. SEO ID NO's edited:  Corrected subheading placement. All responses must be on the same line as each subheading. If the applicant placed a response below the subheading, this was moved to its appropriate place.  Inserted colons after headings/subheadings. Headings edited included:  Defeted extra, invalid, headings used by an applicant, specifically:  Defeted extra, invalid, headings used by an applicant, specifically:  Corrected an obvious error in the response, specifically:  Corrected an obvious error in the response, specifically:  Edited identifiers where upper case is used but lower case is required, or vice versa.  Corrected an orror in the Number of Sequences field, specifically:  A "Hard Page Break" code was inserted by the applicant. All occurrences had to be defeted.  Other:		Edited a format error in the Current Application Data section, specifically:
Edited the 'Number of Sequences' field. The applicant spellod out a number instead of using an integer Changed the spelling of a mandatory field (the headings or subheadings), specifically:  Corrected the SEO ID NO when obviously incorrect. The sequence numbers that were edited were:  Inserted or corrected a nucleic number at the end of a nucleic line. SEO ID NO's edited:  Corrected subheading placement. All responses must be on the same line as each subheading. If the applicant placed a response below the subheading, this was moved to its appropriate place.  Inserted colons after headings/subheadings. Headings edited included:  Defeted extra, invalid, headings used by an applicant, specifically:  Defeted:  One-ASCII 'garbage' at the beginning and of lifes:  page numbers throughout text:  other invalid text, such as  Inserted mandatory headings, specifically:  Corrected an obvious erro: in the response, specifically:  Edited identifiers where upper case is used but lower case is required, or vice versa.  Corrected an error in the Number of Sequences field, specifically:  A 'Hard Page Break' code was inserted by the applicant. All occurrences had to be deleted.  Deleted ending step coden in amine acid sequences and adjusted the '(A)Length:' field accordingly (error up to a Patentin bug). Sequences corrected:  Other:		Edited the Current Application Data section with the actual current number. The number inputted by the applicant was   the prior application data; or other
Changed the spelling of a mandatory field (the headings or subheadings), specifically:  Corrected the SEO ID NO when obviously incorrect. The sequence numbers that were edited were:  Inserted or corrected a nucleic number at the end of a nucleic time. SEO ID NO's edited:  Corrected subheading placement. All responses must be on the same line as each subheading. If the applicant placed a response below the subheading, this was moved to its appropriate place.  Inserted colons after headings/subheadings. Headings edited included:  Defeted extra, invalid, headings used by an applicant, specifically:  Defeted:  non-ASCII 'garbage' at the beginning end of tiles:  page numbers throughout text;  other invalid text, such as  Inserted mandatory headings, specifically:  Corrected an obvious error in the response, specifically:  Edited identifiers where upper case is used but lower case is required, or vice versa.  Corrected an error in the Number of Sequences field, specifically:  A 'Hard Page Break' code was inserted by the applicant. All occurrences had to be deleted.  Deleted ending stop codon in amino acid sequences and adjusted the '(A)Length:' field accordingly (error loue to a Patentin bug). Sequences corrected:  Other:		Added the mandatory heading and subheadings for "Current Application Data".
Corrected the SEO ID NO when obviously incorrect. The sequence numbers that were edited were:  Inserted or corrected a nucleic number at the end of a nucleic line. SEO ID NO's edited:  Corrected subheading placement. All responses must be on the same line as each subheading. If the applicant placed a response below the subheading, this was moved to its appropriate place.  Inserted colons after headings/subheadings. Headings edited included:  Defeted extra, invalid, headings used by an applicant, specifically:  Defeted: One-ASCII 'garbage' at the beginning end of tiles: Secretary initials/filename at end of page numbers throughout text; other invalid text, such as Inserted mandatory headings, specifically:  Corrected an obvious erro: in the response, specifically:  Edited identifiers where upper case is used but lower case is required, or vice versa.  Corrected an error in the Number of Sequences field, specifically:  A 'Hard Page Break' code was inserted by the applicant. All occurrences had to be deleted.  Deleted ending stop coden in amine acid sequences and adjusted the '(A)Length;' field accordingly (error up to a Patentin bug). Sequences corrected:  Other:		Edited the 'Number of Sequences' field. The applicant spelled out a number instead of using an intege
Inserted or corrected a nucleic number at the end of a nucleic line. SEO ID NO's edited:  Corrected subheading placement. All responses must be on the same line as each subheading. If the applicant placed a response below the subheading, this was moved to its appropriate place.  Inserted colons after headings/subheadings. Headings edited included:  Defeted extra, invalid, headings used by an applicant, specifically:  Defeted extra, invalid, headings used by an applicant, specifically:  Defeted extra, invalid, headings used by an applicant, specifically:  Corrected mandatory headings, specifically:  Corrected an obvious error in the response, specifically:  Edited identifiers where upper case is used but lower case is required, or vice versa.  Corrected an error in the Number of Sequences field, specifically:  A 'Hard Page Break' code was inserted by the applicant. All occurrences had to be defeted.  Releted ending stop codon in amino acid sequences and adjusted the '(A)Length:' field accordingly (error to the Patentin bug). Sequences corrected:  Other:		Changed the spelling of a mandatory field (the headings or subheadings), specifically:
Corrected subheading placement. All responses must be on the same line as each subheading. If the applicant placed a response below the subheading, this was moved to its appropriate place.  Inserted colons after headings/subheadings. Headings edited included:  Defeted extra, invalid, headings used by an applicant, specifically:  Defeted extra, invalid, headings used by an applicant, specifically:  Defeted extra, invalid, headings used by an applicant, specifically:  Defeted extra, invalid, headings used by an applicant, specifically:  Defeted extra, invalid, headings used by an applicant, specifically:  Inserted mandatory headings, specifically:  Corrected an obvious error in the response, specifically:  Edited identifiers where upper case is used but lower case is required, or vice versa.  Corrected an error in the Number of Sequences field, specifically:  A 'Hard Page Break' code was inserted by the applicant. All occurrences had to be deleted.  Defeted ending stop codon in amino acid sequences and adjusted the '(A)Length:' field accordingly (error other).  Other:		Corrected the SEQ ID NO when obviously incorrect. The sequence numbers that were edited were:
applicant placed a response below the subheading. This was moved to its appropriate place.  Inserted colons after headings/subheadings. Headings edited included:  Defeted extra, invalid, headings used by an applicant, specifically:  Defeted:		Inserted or corrected a nucleic number at the end of a nucleic line. SEO ID NO's edited:
Deleted extra, invalid, headings used by an applicant, specifically:    Deleted:	ć	applicant placed a response below the subheading, this was moved to its appropriate place.
page numbers throughout text; other invalid text, such as	_	Deleted extra, invalid, headings used by an applicant, specifically:
Corrected an obvious erro: in the response, specifically:  Edited identifiers where upper case is used but lower case is required, or vice versa.  Corrected an error in the Number of Sequences field, specifically:  A "Hard Page Break" code was inserted by the applicant. All occurrences had to be deleted.  Deleted ending stop codon in amino acid sequences and adjusted the "(A)Length:" field accordingly (error up to a Patentin bug). Sequences corrected:  Other:		Deleted: non-ASCII garbage at the beginning end of files: secretary initials/filename at end of page numbers throughout text; other invalid text, such as
Edited identifiers where upper case is used but lower caso is required, or vice versa.  Corrected an error in the Number of Sequences field, specifically:  A "Hard Page Break" code was inserted by the applicant. All occurrences had to be deleted.  Deleted ending stop coden in amino acid sequences and adjusted the "(A)Length:" field accordingly (error up to a Patentin bug). Sequences corrected:  Other:		Inserted mandatory headings, specifically:
Corrected an error in the Number of Sequences field, specifically:  A "Hard Page Break" code was inserted by the applicant. All occurrences had to be deleted.  Deleted ending stop codon in amino acid sequences and adjusted the "(A)Length:" field accordingly (error to a Patentin bug). Sequences corrected:  Other:		Corrected an obvious error in the response, specifically:
A "Hard Page Break" code was inserted by the applicant. All occurrences had to be deleted.  Deleted ending stop codon in amino acid sequences and adjusted the "(A)Length:" field accordingly (errodue to a Patentin bug). Sequences corrected:  Other:	-	Edited identifiers where upper case is used but lower case is required, or vice versa.
A "Hard Page Break" code was inserted by the applicant. All occurrences had to be deleted.  Deleted ending stop codon in amino acid sequences and adjusted the "(A)Length:" field accordingly (endue to a Patentin bug). Sequences corrected:  Other:	(
